

Integrate Salesloft and Snowflake

With Verify connect all your data sources to a data warehouse quickly and with a focus on your business goals. Integrate Salesloft data with your Snowflake warehouse with no coding involved. Access and configure your sales engagement platform data from Snowflake, in real time.

Activate Salesloft with a Snowflake integration.

With Verify connect Salesloft & Snowflake

Teams connect Salesloft to their data warehouse to organize data, learn from their data, build dashboards, and ultimately generate more value for their business. Integrating with Snowflake can help you enrich your insights in down-the-line revenue apps like Salesloft.

Empower your teams to pull data out of Snowflake and into Salesloft to support your sales teams, in real time. Don't stop with Snowflake & Salesloft. Do you have additional revenue apps? Connect those as well and eliminate data silos to reveal deeper intelligence.

"The onboarding was extremely thorough. I love it, it is user friendly when mapping data and making edits."

RACHEL ANDERSON | Customer Acquisition Manager
Expansive

Data automation built for the business, not IT. Trust your apps and your data.

1. No-Code

Start moving Salesloft data quickly and efficiently. Save yourself the headaches of reading API documentation, writing code, and worrying about maintenance. The Verify platform handles it all for you while the Verify Success team ensures your success.

2. Easy to Understand Pricing

With predictable, database size pricing, you know exactly how much your integration will cost every year. We do not nickel and dime.

3. Hands-On Support

Data is complicated and schemas evolve but that should not worry you. Verify has the best support team and process in the business. We are transparent and will ensure that you succeed. Just look at what our customers are saying about us.

4. Unlimited Workflow Volumes

You can build as many workflows from Salesloft to Snowflake as you want without worrying about usage credits or overages. Instead of analyzing your integration costs, you should be learning from trusted data and taking action.
